CASH RECEIPTS AND GOVERNMENT PAYMENTS

GEORGIA - 1998

FARM INCOME AND EXPENSES

HIGHLIGHTS - 1998

Georgia's gross farm income for 1998 is at \$6.31 billion, 2 percent below 1997. The decrease is due primarily to losses in crops. The losses were mostly off-set by increases in poultry and eggs and dairy products. Gross farm income includes cash income, non-cash income, and inventory adjustment. Farm inventory adjustments for 1998 were a negative \$94.2 million compared to a negative \$149.5 million in 1997. Farm production expenses declined slightly to \$4.42 billion.

Cash receipts from farm marketings totaled \$5.45 billion, 5 percent below 1997. Government payments increased to \$178.3 million in 1998 from \$109.2 million in 1997. Net farm income is 5 percent below 1997 at \$1.89 billion.

Georgia ranked 11th among all States in 1998 cash receipts from sales of crops, livestock, poultry and dairy products. The 1998 cash receipts for Georgia represented 2.77 percent of the U.S. total, the same as 1997.

CASH RECEIPTS - 1998

The total cash receipts from the sale of crop and livestock commodities and proceeds from government payments totaled \$5.6 billion, 4 percent below 1997 and the lowest since 1996. Poultry and eggs accounted for 49.7 percent of the total; crops accounted for 36.3 percent; livestock 10.8 percent; and government payments 3.2 percent.

Cash receipts from poultry continues to be the major contributor at \$2.8 billion. This is the fourth year in succession that cash receipts for poultry have broken the \$2.0 billion mark. Broilers continue to rank as Georgia's number one cash receipts commodity. Eggs remained at its fourth place ranking among all commodities with receipts of \$376 million, or 6.7 percent of the total cash receipts.

Cash receipts from crops in 1997 totaled \$2.0 billion, down 13 percent from the \$2.4 billion in 1997. Cotton accounted for 10.5 percent of the total cash receipts with earnings of \$594 million, down \$132 million from 1997. Cotton maintained its place as the second leading cash receipts

commodity. Peanuts accounted for 7.3 percent of the total cash receipts at \$409 million. Receipts from total vegetables reached \$385 million or 6.8 percent of the total cash receipts. Nursery, greenhouse, and sod cash receipts accounted for 4.3 percent of the total or \$241 million, up 6 percent from 1997.

Cash receipts from the sales of livestock and products totaled \$609 million, down 17 percent from 1997. Cattle and calves receipts contributed the most to this category at \$262 million, followed by dairy products at \$240 million and hogs at \$65 million. Cattle and calves and hog receipts declined from the previous year, 22 percent and 49 percent, respectively.

Government payments accounted for 3.2 percent of the total cash receipts up 63 percent from the previous year. This is the highest on record since 1993.

FARM PRODUCTION EXPENSES - 1998

Farm production expenses totaled \$4.42 billion in 1998, down slightly from the \$4.45 billion in 1997. Feed purchases continued to be the single largest expense but dropped 6 percent, or \$55.8 million, from the previous year.

Seed purchased expenses increased 2 percent from last year, at \$134 million. All manufactured input expenses decreased: fertilizer and lime down 13 percent; pesticides down 2 percent; petroleum fuel and oils down 9 percent. Electricity increased 17 percent from 1997. Overall, other intermediate expenses increased 5 percent. The decrease in repair and maintenance of capital items was offset by the increases in machine hire and custom work, marketing, storage, and transportation costs, contract labor and miscellaneous expenses.

Property taxes increased 3 percent to \$105.6 million. Real estate and nonreal estate interest rose 6 percent to \$309 million. Total hired labor increased 5 percent to \$276 million. Net rent received by nonoperator landlords decreased 13 percent to \$82.3 million.

^{1/} USDA estimates and publishes individual cash receipt values only for major commodities and major producing States. The U.S. receipts for individual commodities, computed as the sum of the reported States, may understate the value of sales for some commodities, with the balance included in the appropriate category labeled "other" or "miscellaneous." The degree of underestimation in some of the minor commodities can be substantial. 2/ Discontinued.

^{1/} Final sector output is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of- production. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. 2/ A positive value of inventory change represents current-year production not sold by December 1. A negative value, shown in parenthesis, is an offset to production from prior years included in current-year sales.
